Nerf check	✅ Moon Knight is one of the most dangerous fighters in the Marvel Universe: a boxer, Marine and mercenary who fights like a man who's already died once. On 616 his strength rises and falls with the moon (Moench era), and the show keeps that . Under a full moon, he fights a werewolf to a standstill .

The origin comes in Episode 2. |

| **Marc has been Moon Knight since 2017** (MCU time), in secret | MCU continuity. He's worked **only at street level** until now. |

| **Khonshu is afraid of the Beyonders** | It ties the series to *Time Runs Out*. **Gods are dying** all over the multiverse. |

How the violence is handled: TV-MA, **true to Moench and Sienkiewicz**. The **asylum episodes** are treated with respect for mental illness, and Marc's **dissociative identity disorder** (616) is written **with care**.
