

SAGA TWO BIBLE: THE SECRET WARS SAGA

Phases 4–6 (2021–2031) · Big Bad: DOCTOR DOOM

Status:  LOCKED (the overall structure). The slates and dossiers come when each phase opens.

1. THE FORMAT

Phase	Years	Movies	Disney+ series
Phase 4	2021–2024	9	2
Phase 5	2025–2027	10	2
Phase 6	2028–2031	11	2
Total	2021–2031	30 movies	6 series

Rules (locked):

1. **The movies are the main story.** Every essential beat of the saga happens **on the big screen**.
 2. **Disney+ series are limited to two per phase**, not two per year.
 3. The series **go deeper and wider** (street-level heroes, supporting characters, side stories), but **you never have to watch a series to follow the movies**. Series events can be *referenced* in films, and are always explained there.
 4. Every series gets a **Series Dossier** (same template as the films, plus episode count, runtime and release pattern), written automatically.
 5. All earlier rules still apply: **Earth-616, comic accuracy, nobody gets nerfed, the Casting Rules, real-time continuity and automatic dossiers**.

2. THE BIG BAD: VICTOR VON DOOM

First appearance: *Fantastic Four* #5 (July 1962), Stan Lee & Jack Kirby.

Played by: **Robert Downey Jr.** (locked in *Fantastic Four*, 2013). In our reality Doom is his signature Marvel role.

Why Doom

1. **He's Marvel's greatest villain.** He's a genius equal to Reed Richards, a **master sorcerer**, **the absolute monarch of Latveria**, and a man who has **stolen the Power Cosmic** and **taken godhood**. No other 616 villain has done as much.
2. **He's already on the board.** We met him in *Fantastic Four* (2013), when he beat all four of them in round one and **escaped by sorcery**. His mid-credit scene set up his **time platform**. In *Avengers Forever* (2019) he **went for the Infinity Gauntlet himself**. Doom has been watching the heroes lose since 2013.
3. **He's the opposite of Thanos.** Thanos was a nihilist who wanted to be loved by Death. **Doom is a man who believes he should rule everything, and he might be right.** He wants to **save the universe**, and to be the one who owns it.
4. **The 616 story is already written.** Jonathan Hickman's run (*Avengers / New Avengers*, 2012–15) leads to *Secret Wars* (2015–16), where **the multiverse dies** and **Doom rebuilds what's left as its God**. It's the definitive modern 616 epic, and it grows out of **the Illuminati**, whom we already set up in *Planet Hulk* (2018).
5. **Nobody is nerfed, and that includes the villain.** At the saga's height, **Doom takes the power of the Beyonders** and becomes **God Emperor Doom**. The heroes have to beat something **even bigger than the Infinity Gauntlet**.

Comic-accurate canon (locked)

- **Origin:** a Romani boy from **Latveria**. His mother **Cynthia** made a pact with **Mephisto** and died for it. **Mephisto already exists in our MCU** (Ciarán Hinds), and **Doom's lifelong goal is to free his mother's soul from Mephisto**.
- **At Empire State University** his forbidden machine exploded after **Reed warned him**. He trained with **Tibetan monks**, put on **the mask while it was still red-hot**, and took **Latveria**.
- **Science and sorcery:** Doom is both. He's **Sorcerer Supreme-class** (on 616 he took the title in 2015), and his technology rivals Reed's.
- **His code:** Doom **keeps his word**, protects **Latveria's people**, and **never lets anyone else kill Reed Richards**.
- **Doom isn't evil in his own eyes.** He's **the only one competent enough to save everything**.

The cosmic threat behind him: the Beyonders and the Incursions

- **Incursions:** two universes' Earths **collide**, and **both universes die** unless one of the two Earths is destroyed first (Hickman's *New Avengers*, 2013).
- **The Beyonders**, beings from beyond the multiverse, are **deliberately destroying it** (*Avengers/New Avengers*, 2015).
- **The Molecule Man** (Owen Reece) is **the bomb they planted in every universe**, and **Doom's key to beating them** (*Secret Wars*, 2015).
- **The Illuminati have to decide which worlds die**, and that drives them apart. **Black Panther** vs. **Namor**. **Cap** vs. **Tony**.

- **In memory of Chadwick Boseman (1976–2020):** under the real-history rule, **T'Challa died in the MCU in 2020, off-screen, of illness. Shuri (Letitia Wright) is Black Panther** (616: *Black Panther* vol. 5, 2009) and takes **Wakanda's seat among the Illuminati**. The role Hickman wrote for T'Challa is hers.
-

3. THE SAGA NAME: THE SECRET WARS SAGA

Why this name:

- It's taken straight from 616: ***Secret Wars*** (1984–85, Jim Shooter, **the Beyonder, Battleworld, Doom steals the Beyonder's power**) and ***Secret Wars*** (2015–16, Jonathan Hickman, **the multiverse ends, God Emperor Doom**). **Both Secret Wars climax with Doom becoming a god.**
- Like "the Infinity Saga," it's **the name of a story, not a franchise**. The public won't hear it until the right moment.
- It fits the secrecy that runs through the whole plan: **the Illuminati's secret war** to save reality, fought behind the backs of the heroes who trust them.

The three-phase arc (following Hickman's structure)

Phase	Hickman arc	Where the saga is
Phase 4 (2021–24)	"Everything Dies" (<i>Avengers/New Avengers</i> 2012–14)	The first Incursion. The Illuminati re-form in secret. The multiverse is revealed. Doom watches, and prepares.
Phase 5 (2025–27)	"Time Runs Out" (2015)	The Illuminati and the Avengers go to war over which worlds die. Doom hunts the Beyonders. The universes run out.
Phase 6 (2028–31)	"Secret Wars" (2015–16) and <i>Secret Wars</i> (1984)	The multiverse ends. Battleworld. God Emperor Doom. The heroes' final war against a god who did save everything. The ending: Reed rebuilds the multiverse, and Doom's face is healed.

Seeding plan

- **Phase 4:** a **second Earth appears in the sky** over Wakanda (the first Incursion, *New Avengers* #1, 2013). T'Challa calls the Illuminati. **The Black Swan.** Doom's **time platform** comes back. Mephisto and Doom **start their war over his mother's soul.**
 - **Phase 5:** "Time Runs Out." The **Cabal** (Namor's Earth-destroyers) splits from the heroes. **Doom meets the Beyonders. The last Incursion begins.**
 - **Final shot of Phase 5:** everything goes **white**, then a single title card: **"SECRET WARS."**
 - **Phase 6:** Battleworld. God Emperor Doom. The saga's two-part finale.
